

Reclaimed Water Hauling

Available at Four Locations
Throughout Town

At just \$1.00 per 1000 gallons, reclaimed water can provide an affordable, environmentally sound alternative to potable water. Reclaimed water can be used for many purposes that do not require potable water such as; *landscape irrigation, vehicle washing, street and sidewalk cleaning, livestock watering, and more*. For a complete list of reclaimed water applications, contact the Flagstaff Utilities Department.

Class A+ and Class B reclaimed water available. Please note that the type of use for reclaimed water is dependent on the reclaimed water quality. The City of Flagstaff has Class A+ reclaimed water, produced at the Rio de Flag Water Reclamation Plant, available at three locations throughout town. In addition, you may obtain Class B reclaimed water from the Wildcat Hill Wastewater Treatment Plant on the East side of town. Contact the Flagstaff Utilities Department to determine what quality of reclaimed water is required to suit your needs.

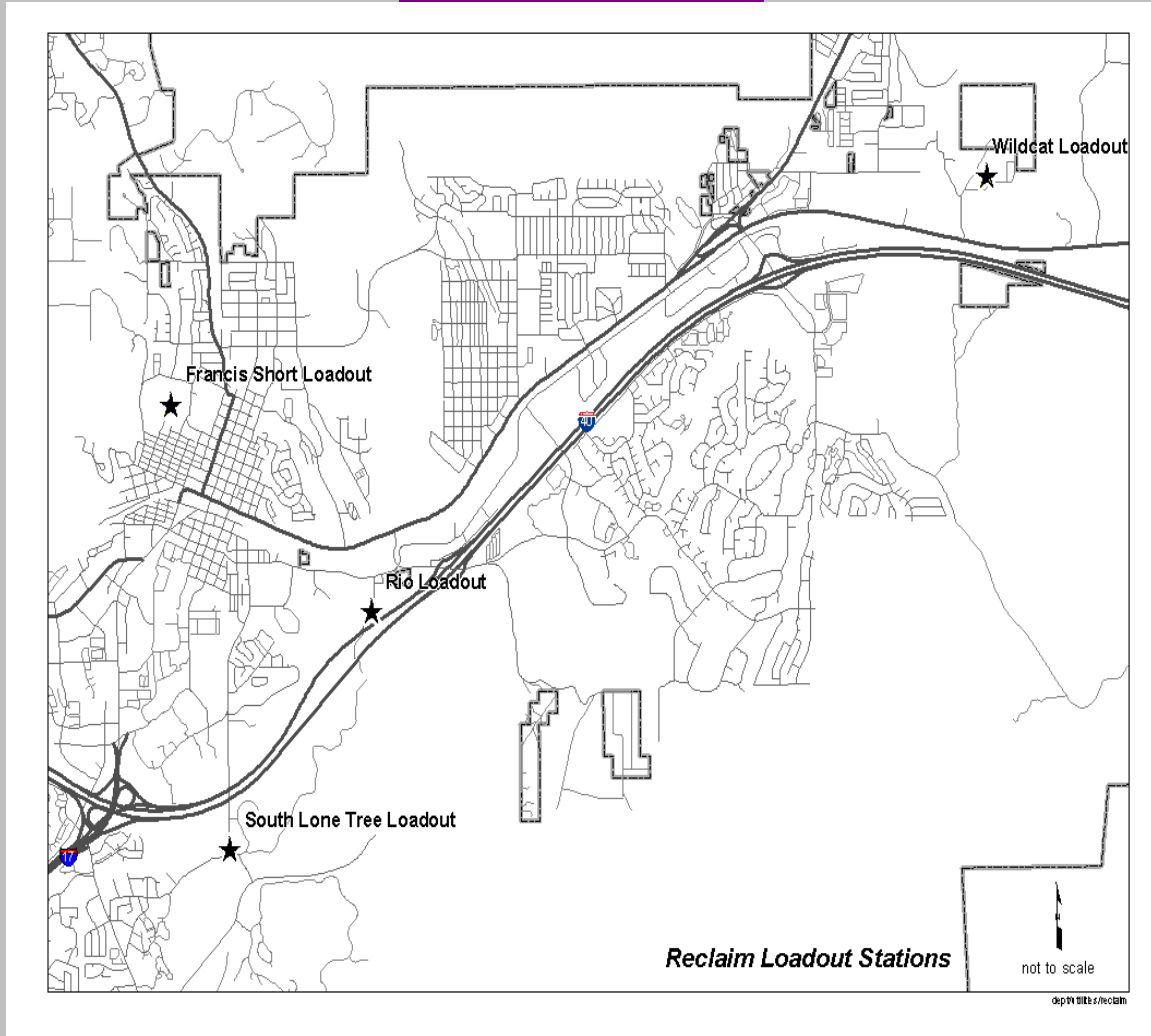

How do I obtain reclaimed water? To haul reclaimed water you must complete a user agreement with the Utilities Department. Agreements are available at the treatment facilities for no cost. If you will be using Class A+ reclaimed water, you must have an agreement with the Rio de Flag Water Reclamation Plant. For Class B reclaimed water you must have an agreement with the Wildcat Hill Wastewater Treatment Plant. For facility hours call the Rio de Flag at 556-1301, or Wildcat Hill at 526-2520.

Guidelines

- ⇒ Reclaimed water hauling equipment and conveyances must have visible signage. Signage shall indicate the equipment is only to be used for non-potable or reclaimed water.
- ⇒ Reclaimed water tanks shall only be filled with reclaimed water. Once a tank has been filled with reclaimed water, it shall not be used for potable water.
- ⇒ Billing for reclaimed water is on the 'honor system'. Customers must agree to log and pay for each and every load.

For more information, please call 779-7685 ext. 4827
